The NFL is getting more serious about conduct in the stands. This year, its teams are requiring any fan who gets ejected from a stadium to take a four-hour online course before they are permitted to come back into the facility again.

The course, designed by psychotherapist Dr. An Newark in tandem with the NFL's Stadium Security Director David DeLuca, focuses on alcohol abuse, anger management and crowd behavior. A handful of teams have used the course over the past couple seasons, but this autumn, as part of a review of their best practices, every team decided to enforce the course as a condition for the season.

"This program was designed to say to people, 'We want you to have fun when you come to a game, but you have to have fun the right way.'"

"For decades, some fans have believed that when they get on the ground of their favorite place on their favorite team and they enter a stadium, they can behave any way they want," Newark said. "This program was designed to say to people, 'We want you to have fun when you come to a game, but you have to do it the right way.'"

Wired: When did you first hear the word wiki?

Wales: I'm not sure, but the first time the word became clear to me was in December 2000, when James Gourlay, who worked with me at the time, proposed using a wiki on the encyclopedia project. We decided to give it a try, and we got more work done in two weeks than we had done in two years.
